

# Day 4 - Dynamic Frontend Components – Avion\_Ecommerce

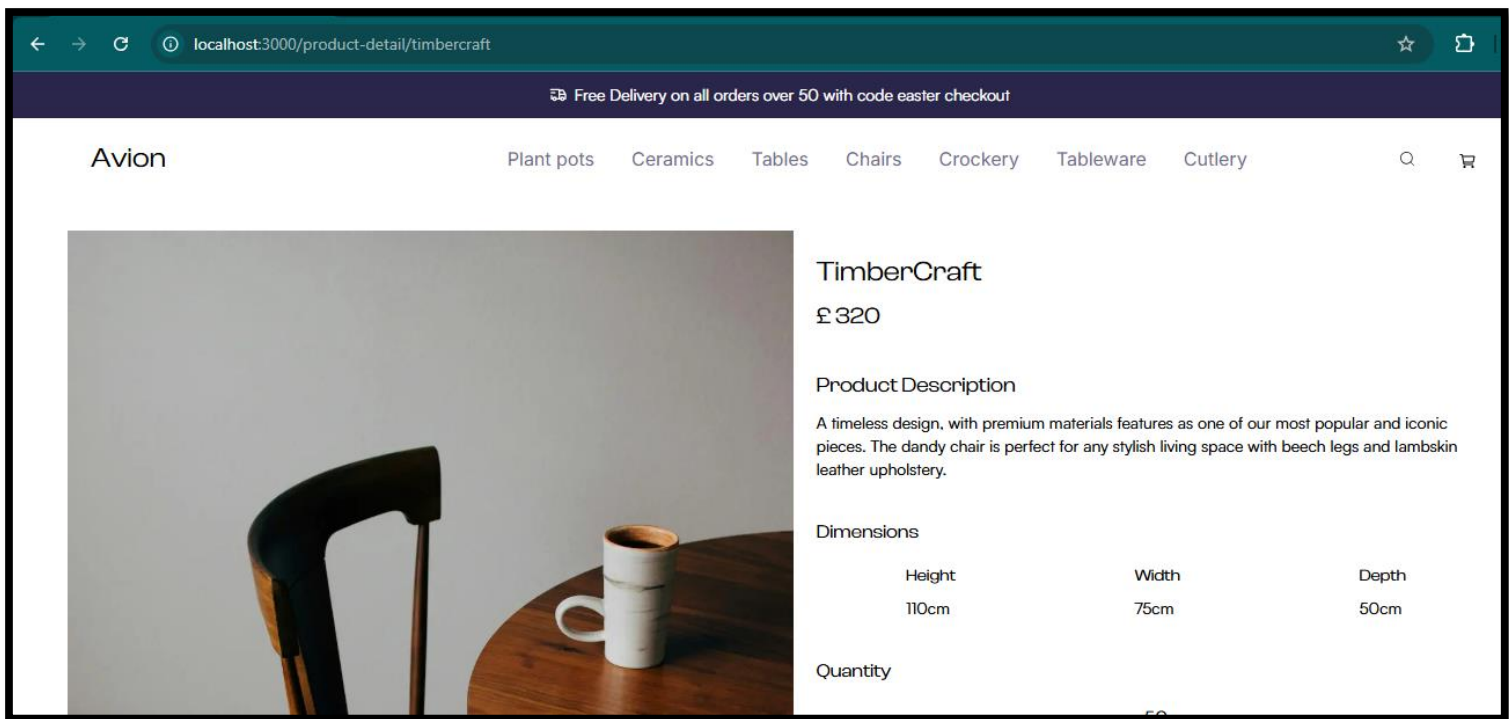

## Code snippets for show product dynamically

```
return (
  <main>
    <div className="py-4 px-6 pt-8 medium:px-28 ">
      <p className="clashdisplayFont text-xl mb-3">You might also like</p>
      {/* Images */}
      <div className="grid grid-cols-2 gap-2 tablet:grid tablet:grid-cols-3 laptop:grid
laptop:grid-cols-4">
        {product.map((product) => (
          <div key={product._id}>
            {product.image && (
              <Link href={` /product-detail/${product.slug.current}`}><Image src={urlFor
(product.image).url()}
                alt="image" width={163} height={163} className="hover:scale-105
                hover:duration-300" /></Link>
            )}
            <div>
              <p className="clashdisplayFont text-xl">{product.name}</p>
              <p className="satoshiFont text-lg">£ {product.price}</p>
            </div>
          </div>
        )
      )}
    </div>
  )
)
```

## Dynamically showing data of product

- ✓ Used reusable components
- ✓ Show up the product detail dynamically
- ✓ All the code/website is responsive
